

INFIRMED DOGS AND SENIORS 12 YEARS AND OLDER

I understand and agree that my _____year old dog is in good health, is ambulatory, eats its meals, is in control of its bladder and bowels, does not need injections, and if on medication, takes it willingly. I have evaluated my dog's ability to take care of itself before making an appointment or reservation with The Doghouse. I understand that boarding can be stressful and may cause underlying conditions to become apparent or worsen. I have discussed my dog's individual needs and health conditions in advance with The Doghouse staff, along with what to do if something changes.
